

When a Hikvision device and a Galaxy intruder alarm device are used in the same project, customers are always looking for a central management platform that can manage all devices. This is where HikCentral Optimus Integration Solution can help your business.

### Solution Introduction for central management platforms.

Integrate galaxy dimension control panel with HikCentral via Optimus-HCP-HoneywellGalaxy/IntruderDetection

connector, providing:

- Real-time two-way event linkage between Hikvision and third-party device/system, with retrievable event records on HikCentral.
- Central management of all devices/resources on HikCentral.
- Data synchronization from third party system to HikCentral .
- Health monitoring of third party resource.

# Solution Architecture.

Note: For HikCentral ROSE failover solution, Optimus Core and Connectors should NOT be installed on HikCentral Server.

# **Galaxy Integration Solution Values**

#### **Recourse Central Management**

Manages both Hikvision and Galaxy products centrally on HikCentral in user-defined area/group and static map or geographic map, to free the operators from struggling with multiple GUI.

#### Easy To Use Graphical User Interface

Provides a visualized interface of configuration and management of third party integration. Transforms the traditional black box of integration to a user-friendly interface. Significantly simplifies the follow-up work on maintenance and management of the integrated systems.

#### Accurate intruder detection

Combine advantages of Hikvision video surveillance detection and Galaxy intruder detection and provides accurate intruder detection and video footage for alarm reviewing, to free the security personnel from dealing with false alarm.

## Hikvision Optimus (v1.1.1 and later)

Optimus is a HikCentral event management hub that translates events and actions from third party integrations to HikCentral and Vice-Versa. Optimus provides multiple modules to allow users to connect third party applications such as Access Control, Alarm Monitoring Centers, Fire Panels, Heating Ventilation and air conditions etc.. to Hikvision VMS HikCentral.
