

CORNER TO CORNER 180° FIELD OF VIEW

Pro Series Panoramic Cameras
with ColorVu Technology

Seamless fusion of images in one shot

The Pro Series panoramic cameras with ColorVu Technology are powered by pioneering image fusion technologies, combining images captured by the dual-lenses into a single panoramic shot.

ColorVu Technology

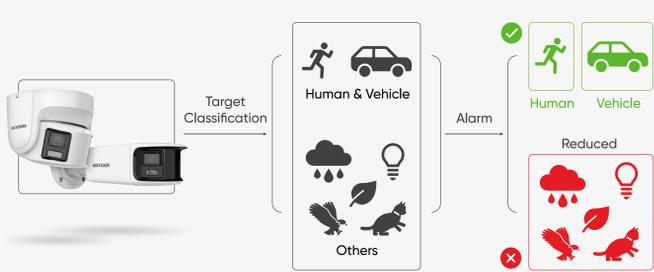

View in full colour, 24 hours a day
 Hikvision ColorVu Technology makes it possible to capture vivid, full colour details – such as the colour of people’s clothing or of a car – even in total darkness.

Live Guard

Light and sound deterrence
 Built-in strobe light and audio alarm will warn off intruders upon detection.

AcuSense Technology

Accurate human/vehicle classification
 AcuSense Technology detects targets and classifies them into human and vehicle categories, while disregarding others.
 *AcuSense Technology supported on both channels

Application Scenarios

Lobby

Food Court

Shopping Centres
