

DATA TRANSMISSION UP TO 5 KM

Outdoor Wireless Bridge

Hikvision's **Outdoor Wireless Bridge** enables stable transmission of data over long distances, reducing wiring difficulties while remaining budget friendly.

5 KM

Wireless Transmission Distance

Enhanced antenna design

Strengthens signal and extends coverage distance with built-in, high-gain 9 dBi antenna

Flexible networking

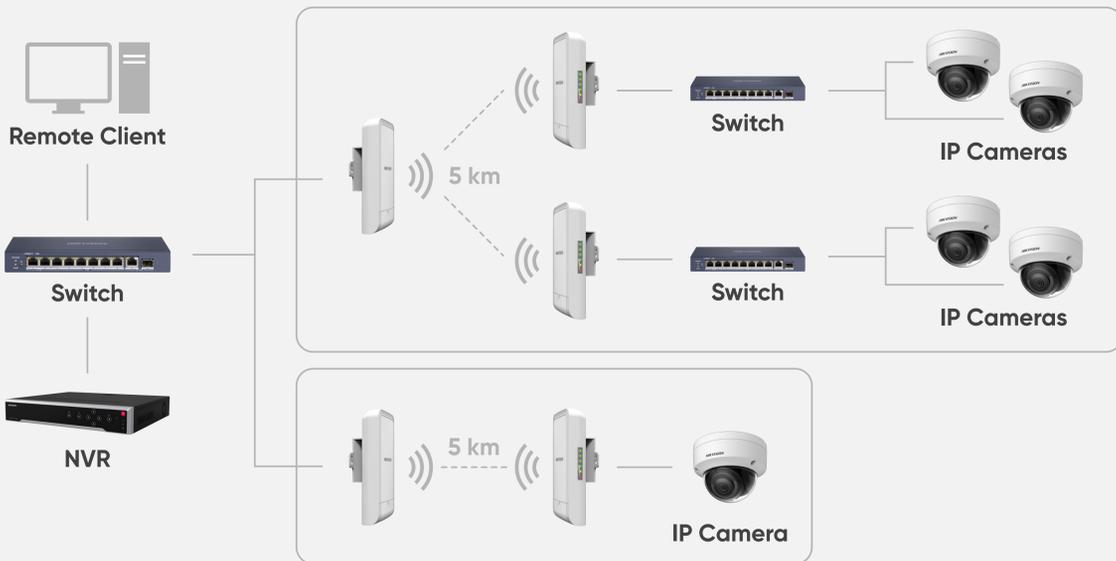

Provides multiple networking topologies to meet various scenarios, including point-to-point, back-to-back and point to multi-point

Professional outdoor design

Outdoor UV-resistant plastic material adapts to extreme cold or hot weather

Application Topology

Product Showcase

DS-3WF02C-5AC/0

- ▶ Up to 5 km transmission distance
- ▶ 5 GHz 802.11/a/n/ac wireless standard
- ▶ Built-in 9 dBi directional antenna
- ▶ Output power 22 dBm
- ▶ Antenna angle: 35° ± 5°
- ▶ TDMA, DFS, TPC supported
- ▶ Visualised topology management
