HikCentral Professional Evidence Management Solution

Introduction

When accidents happen, the operator needs to search and export video clips among multiple devices to create an integrated evidence chain for long-term storage.

However, in traditional way, evidence management can be quite inconvenient and time-consuming.

Inconvenient to export	Costly and easy to lose	Difficult to search

Export — USB flash drive

Manually check and export evidence among different NVRs via USB flash drive.
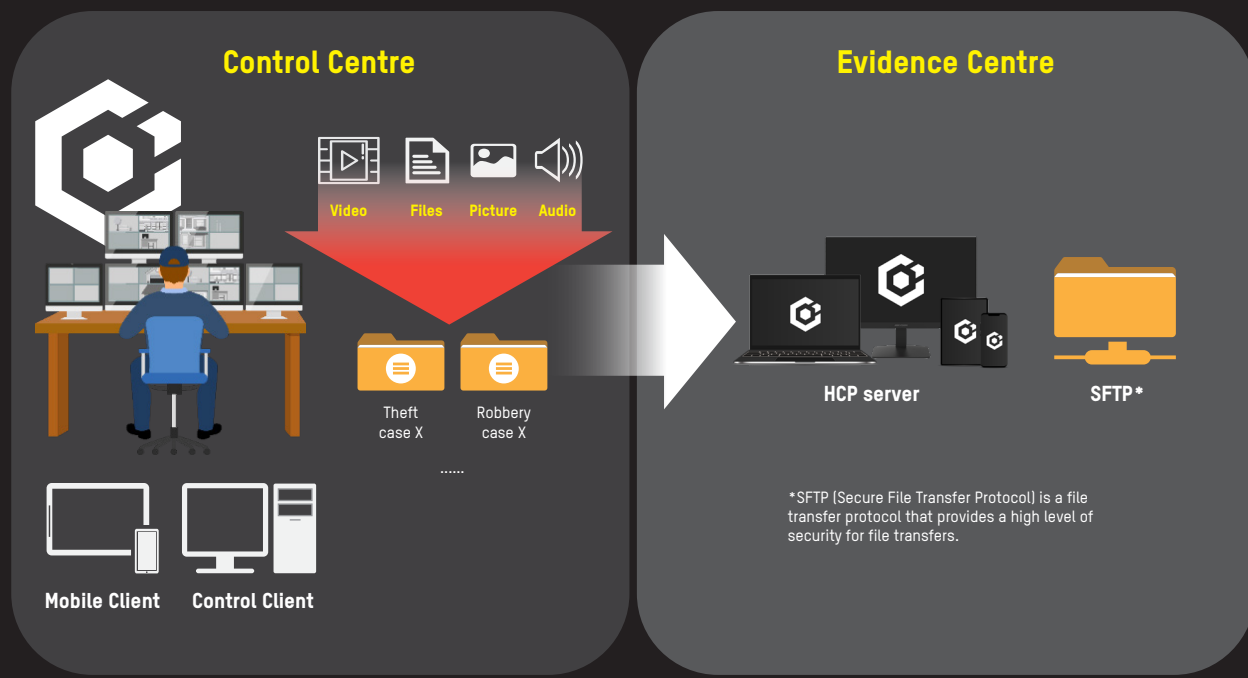

To record on DVD/CD for long-term storage is quite costly and easy to lose.

Takes a lot of time and effort to search evidence among all DVDs.

What is evidence management?

HikCentral Professional designs and implements a highly reliable evidence management solution to help users quickly collect evidences across different systems and save them in long-term instead of using traditional DVDs. Integrated evidence chains will be created and stored eventually.

HCP server   SFTP *

*SFTP (Secure File Transfer Protocol) is a file transfer protocol that provides a high level of security for file transfers.

### Scenarios

CITY   TRANSIT   EDUCATION   RETAIL

Core Features

Save evidence easily and conveniently

Multiple ways to save evidence

Once the operator finds evidence, he can use mobile phone, web browser or control client to upload it to the evidence centre directly.

HikCentral Professional evidence centre

Mobile App   Portal/control client

**Scheduled backup under limited network**

When vehicle encounters emergency, the driver can inform the control centre to set a scheduled backup plan. Once the vehicle has come back to WIFI area, the video will be automatically uploaded to evidence centre following the backup schedule.
