

# HikCentral Professional

**HIKVISION**<sup>®</sup>

**CENTRAL.  
COLLABORATIVE.  
INTELLIGENT.**

# CORE VISION

At Hikvision, we continually develop and deliver the very best end-to-end solutions in the security surveillance industry. In that spirit, the newly released HikCentral Professional is a comprehensive, AI-empowered surveillance platform that makes easy-to-use central management available everywhere it is needed.

In order to provide project-specific solutions, additional functions and services from collaborative partners are essential. Therefore, our video management platform is designed to be Central, Collaborative, and Intelligent.

---

## CENTRAL

HikCentral Professional is completely centralized to achieve vast integration capabilities and deliver more powerful solutions.

It integrates and expands devices on a VMS system, and enhances control to achieve maximum security for years to come.

---

## COLLABORATIVE

HikCentral Professional empowers partnerships, enhances value for the user, and delivers extensive benefits across a wide range of vertical markets.

---

## INTELLIGENT

HikCentral Professional takes the latest AI technologies to the next step, leading the security industry as well as technological innovations in various applications.

# WHAT IS HIKCENTRAL PROFESSIONAL?

HikCentral Professional is a highly effective platform, which has been developed to improve central Video Management Systems (VMS) and integrate related hardware. It represents a new breed of video surveillance components, offering customers what they need to launch a multitude of smart applications over a wide expanse of industries.

# SYSTEM

## • System Architecture

### Server Layer

- Central management on HikCentral Professional as master or slave backup
- Flexible storage achieved by pStor, Hybrid SAN, and Cluster Storage Server
- Expandable applications on RSM

### Device Layer

- Access analog cameras via DVR, access IP cameras directly or via NVR
- Decoder display on Smart Wall
- Security control panel and alarm station
- Access control via door controller and Face Recognition Terminal

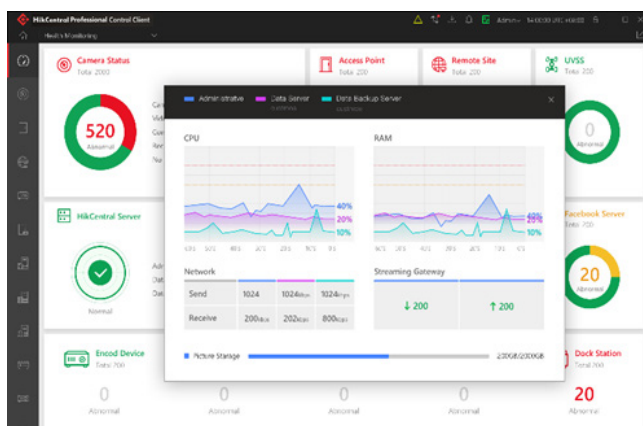

## ► Key Advantages

HikCentral Professional covers not only basic functions, but also site implementation, daily maintenance, and user accessibility. The following are some key advantages.

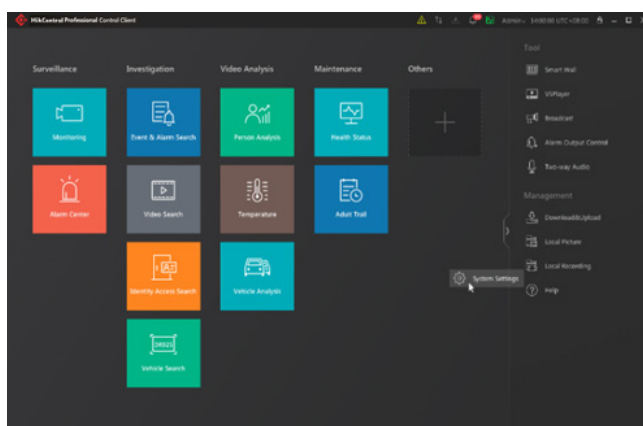

### Scalable

RSM (Remote Site Management) enables single-site to multi-site expansion, making it convenient for users to remotely manage servers located at different sites. This is an ideal solution for companies or organizations with branches.

### Maintainable

Quick and accurate error diagnoses for efficient maintenance. The system will diagnose and generate detailed event logs, device logs, and health monitoring. It also supports batch firmware upgrades.

### Friendly

Drag-and-drop application icons on the Control Client to easily create your own user-defined dashboard. The monitoring view also supports self-adaptive window division and more.

# VIDEO

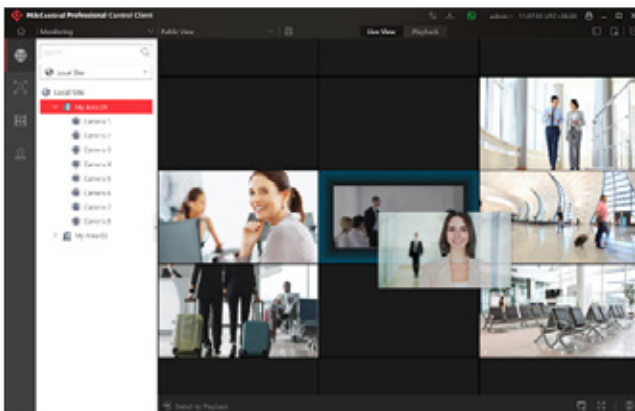

## ► Live View

---

## Visual Tracking

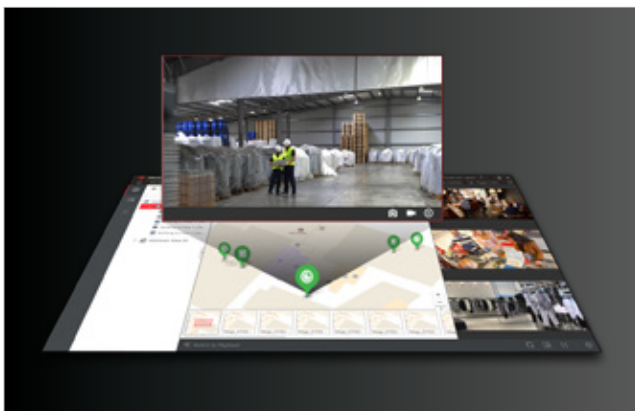

- Compatible with common cameras
- Detailed and easy tracking of the complete moving process
- Supports export of a complete action video of a certain target in the visual tracking mode

---

## Adaptive Window Division

- Auto-adapting window division brings a more intuitive experience and more visual control
- Supports quick drag and drop of any part of the view in a new window to see more details, optimizing HD and panoramic camera usage and creating a more intuitive experience

---

## Map Management

- Label cameras as resources, then drag and drop them to a destination on the map
- Control video live view and play back, as well as find other operations on the map
- Receive and respond to alarms in real-time

## ► Playback

### Playback Features

Video playback offers various useful features, including:

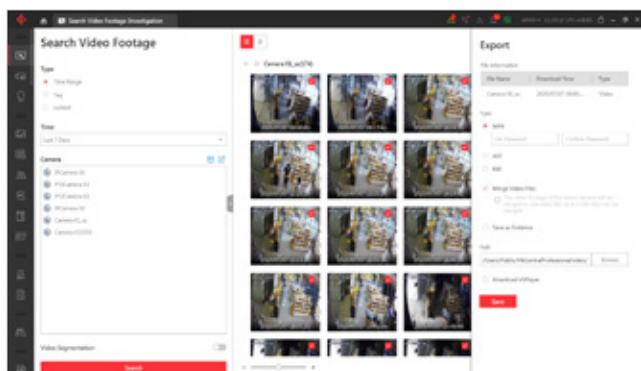

- Flexible network configuration, supporting sub-stream, transcoded, and frame-extracting playback
- Quick incident location with thumbnails
- Adding tags to suspicious events for later review
- Locking video footage to prevent overwriting

### VCA Search

"After-the-fact" VCA search provides convenient analyses, including:

- Motion Analysis
- Line Crossing Detection
- Intrusion Detection

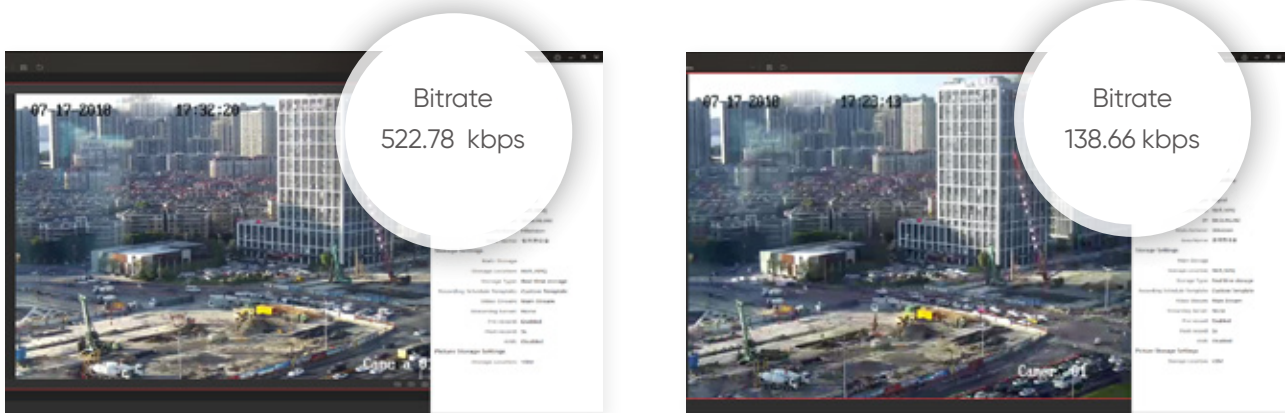

### Video Export as Evidence

- Supports merging several clips into one video file for downloading, making management flow simpler and easier
- File export is available in various formats including .exe, .avi, .mp4, and more

# ► Video Network Optimization

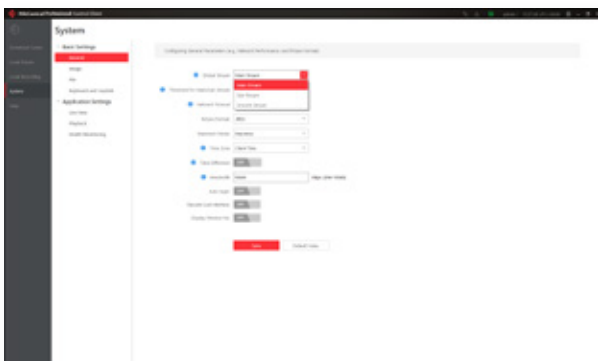

## Low Bandwidth Network Adaptability

Smooth Streaming automatically adjusts bitrate and resolution between clients and NVRs / IPCs according to real-time network conditions, which makes the live view more fluid.

## Global Stream Setting

For the live stream in the global view, select the default stream. If the network is operating smoothly, select the main- or sub-stream. If the network is lagging, select smooth stream.

## Direct Stream Policy

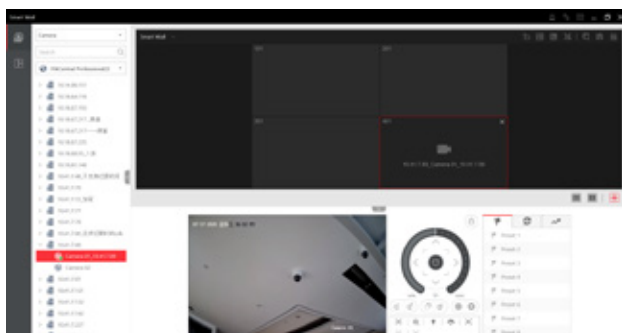

When the system detects that the Control Client and the device are in the same local-area network, the video stream can be obtained directly.

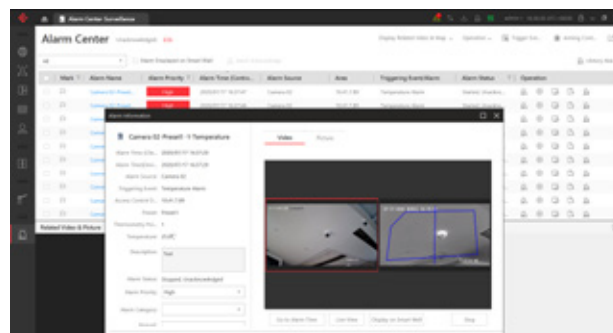

## Smart Wall

### Decoding Devices

- Support decoding multiple devices and integrate easily with third-party devices
- Enable flexible event-triggered, alarm rule settings. Alarm message can be accessed via the software as well as the smart wall for quick notifications
- Support remote projection on the smart wall using a PC, enabling easy review of operations and maintenance status on the software platform, BI dashboard, and more
- Support view-saving and manual switching on the smart wall, along with viewing schedules and automatic switching
- Support the use of a USB-connected keyboard to control the software and network keyboard to control the smart wall

Single Mode

Joint Mode

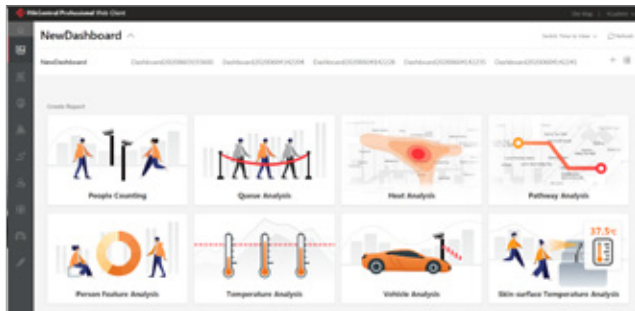

Division Mode

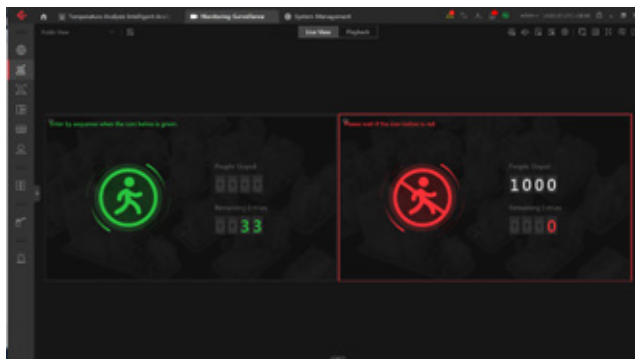

Roaming Mode

## ► Video Analysis

## Intelligent Analysis Dashboard

- The video-based intelligent analysis dashboard enables flexible and extensible digital applications
- Including smart commercial analysis like flow, attribute, wait-time, and visitor trend analyses, as well as vehicle management and temperature measurement

## Flow Analysis

Real-time flow status can be displayed on the platform along with mapping, temperature screening, and other key video footage.

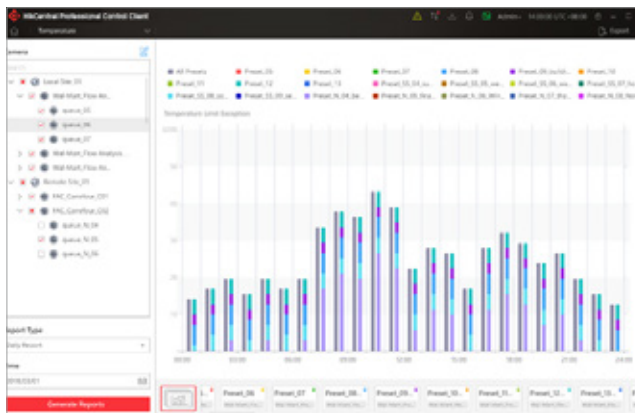

# ► Thermal Imaging

## Temperature Screening

- Provides statistics along with centralized, multi-site management using remote supervision
- Supports evidence recording and site management of statistics across multiple devices

## Temperature Statistics

- Records abnormal data as well as maximum and minimum temperature at all preset points
- Generates anomaly statistics for all measurement points
- Monitors temperature changes at specific locations
- Notices abnormal situations to avoid potential risks

## ► Extensible Storage

### Flexible Storage

HikCentral Professional offers event-triggered video recording and playback, along with automated video backup during idle periods. Channel-based video and image storage can be configured as well.

### Multiple Storage Media

Video and images can be stored on various media storage platforms, such as NVRs/DVRs, pStor, Hybrid SAN, and Cluster Storage Servers.

### High Availability

HikCentral Professional features a fail-safe / high availability design with redundant remote & local backup and scheduled copy-back, along with pStor cluster services and NVR hot swapping.

# ACCESS CONTROL

## Key Features ▶

### Monitoring on Map

Enables monitoring and alarms for active, abnormal or violent door openings

### Personnel Registration

Supports completing personnel registration via QR code scanning

### Roll Call

Supports automatic printing of personnel name lists where fire alarms are installed

### Quick Maintenance

Supports checking "Who" is allowed to access "Where" and "When"

## Face Recognition Turnstile

HikCentral Professional integrates Hikvision's turnstile with Face Recognition Terminals and other third-party gates as well.

## ▶ New functions

### Attendance

#### Automated Attendance by Face Recognition

Supports automated attendance by face recognition, which is more convenient and efficient

#### Easy Third-Party Integration

Easy integration with third-party attendance system and automatically generates attendance reports with multiple formats to choose from

#### Customized System Configuration

Supports complex attendance setting to satisfy various needs, including working time, weekend, late arrival and early departure, absence, overtime working, leave types, and etc

## Visitor Management

How does our visitor management module works?

### Registration

Visitors make registration with their ID cards or passports

### Check Out

Visitors can complete self-check-out via the pre-configured access control device

### Visitor Check-in and Registration

Visitors arrive at the reception desk and complete registration via the visitor terminal

### Permission Grant

Visitors are granted with access credentials via cards, fingerprints, face recognition and QR codes

### Record Traceable

Historical visitors' records are saved and easy to trace

## Video Intercom

- Serves as a centralized platform to manage the video intercom system
- Supports configuring related devices and setting rules for device interaction
- Uniformly configures personnel access permissions and remotely controls access control
- Pushes calls from the indoor or outdoor station to the management staff

# Entrance & Exit Management

Flexible entrance modes and authorization rules enhance efficiency and reduce resource usage.

## Vehicle entrance & exit management

Customizes release rules for familiar/unfamiliar vehicles discretely

## Leasing agreement management

Supports configurations for parking space allowance where multiple companies lease parking spaces

## Information display

Displays welcome message and vehicle information on LED screen

## Alarm management

Supported alarms include Overstated Parking, Park in Forbidden Period and Call Center

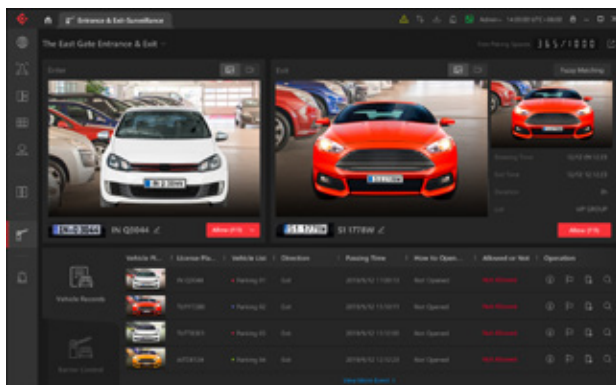

## Strong capacity

Supports up to 8 traffic lanes and relays events triggered by ANPR cameras, video intercoms and access control devices

## Watchhouse Mode

In the professional Watchhouse mode, all entrance & exit related information is compiled to help staff quickly let vehicles exit.

## Information display of passing vehicles

Displays images and real-time video of passing vehicles, supporting manual verification

## General matching

General preliminary comparison match for vehicles not fully recognized when exiting

## Manual release

Supports manual release and records the justification

## Displays remaining parking spaces

Shows number of remaining parking spaces in real-time

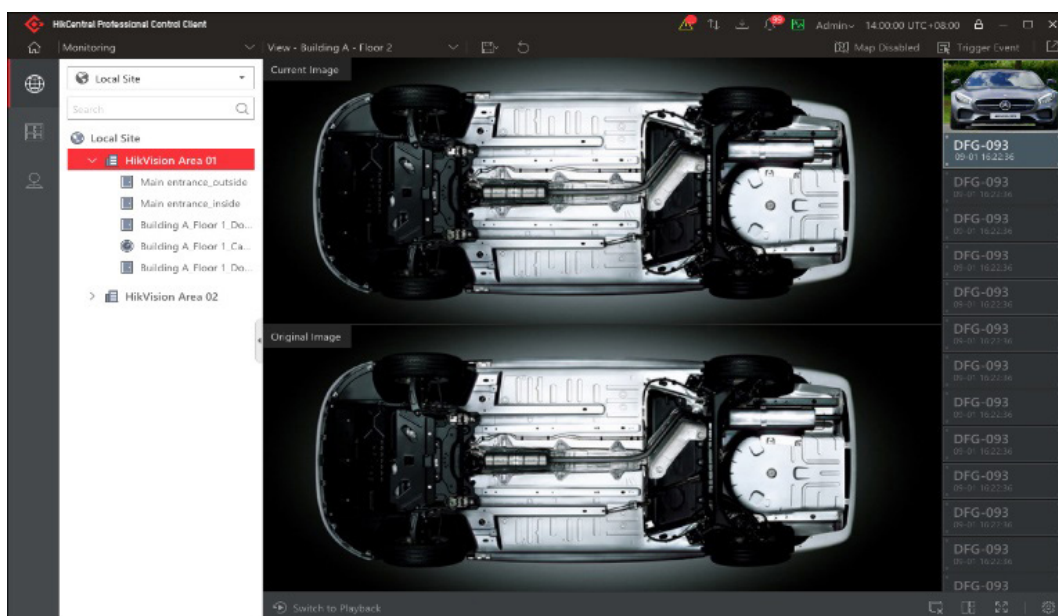

## Historical record search

Easy and efficient history tracking

## Under Vehicle Surveillance System (UVSS)

### Advanced UVSS

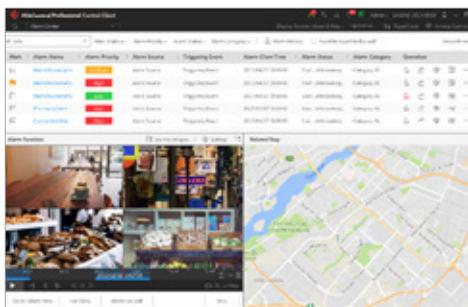

- Captures vehicle undercarriage images
- Synchronizes ANPR camera data with vehicle images
- Suits various vehicle models
- Displays entire vehicle chassis in one image
- Features high-durability and high-quality imaging with low distortion

# ALARM MANAGEMENT

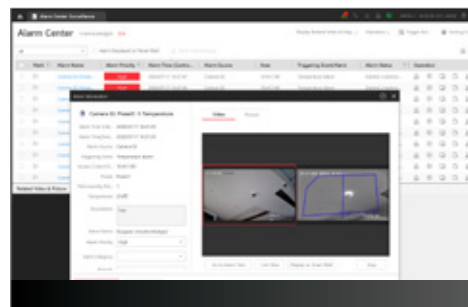

## Alarm Sources

HikCentral Professional can centrally manage various alarm sources, such as video, access control, alarm panels, and third-party alarm inputs.

## Alarm Center

- Real-time display of all kinds of alarms
- Linked videos and locations will be displayed automatically when an alarm is selected

## Alarm Linkage

- Flexible linkage with access control devices, cameras, and more can be configured
- Displays the status of alarm-triggering devices and quickly locates devices that have triggered alarms

## Composite Alarm

A composite alarm enables arming or disarming in order to promote flexibility and accuracy of alarm management. For example, you may use composite I/O signals and motion detection events by installing infrared beams, effectively reducing the false alarm rate.

## Alarm Escalation

Alarm escalation takes place when the primary operator does not respond. An unprocessed alarm will be forwarded and escalated to upper level management when the original operator ignores.

# MAINTENANCE

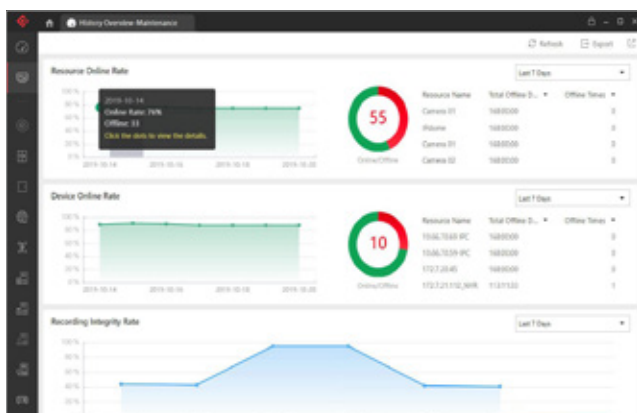

## Health Monitoring

- Displays topology diagrams of various devices in real time, sparing the efforts of viewing a large number of connections among devices
- Displays system information, such as CPU, RAM, network speed and video streaming usage
- Users can define a threshold according to network status

## Firmware Batch Upgrade

Supports upgrading of multiple devices' firmware simultaneously

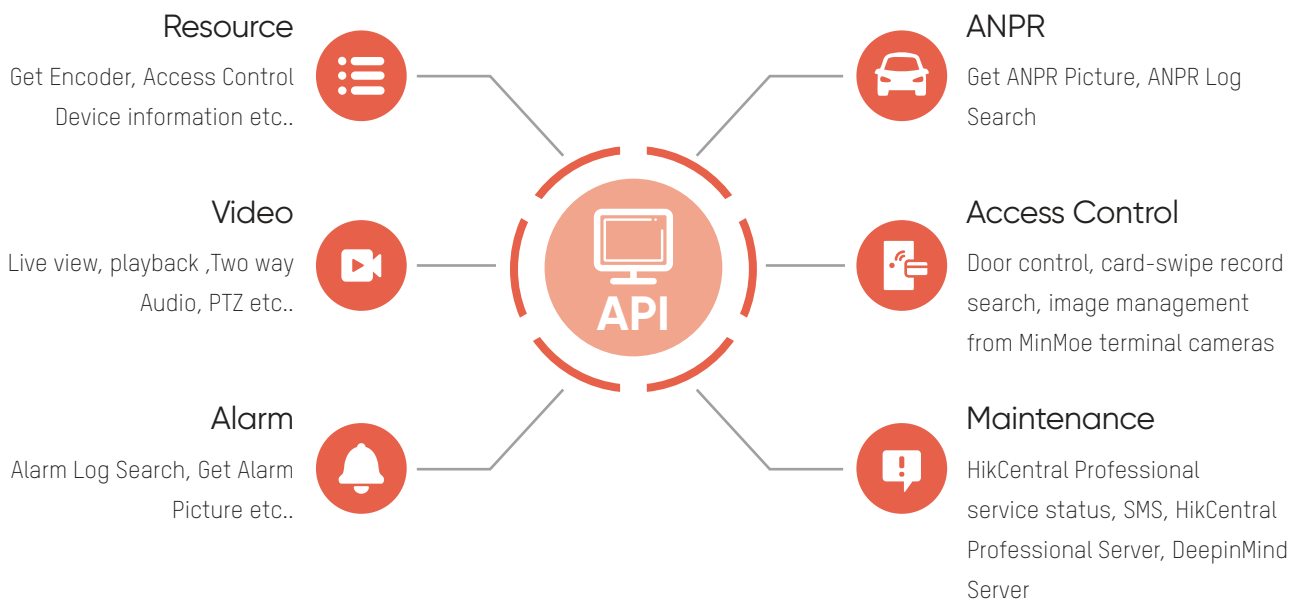

## History Overview - Maintenance

- Overview of resource online rate, device online rate and recording integrity rate within certain period
- Helping better understand the operation status of the system

# OPEN PLATFORM

## Open API

Collaborative, goal-oriented development creates the most useful and customizable applications. Hikvision has created an open Software Development Kit for innovated systems to meet any particularized demand.
