

HIKVISION® Evidence Management Solution

Hikvision Evidence Management Solution is a centralised security solution which provides powerful functions to enable the management of critical incidents and important data for your customers. Based on Hikvision's own HikCentral VMS software, users can easily and quickly collect data from different locations, and furthermore securely share evidence with the police, emergency services and other authorised parties.

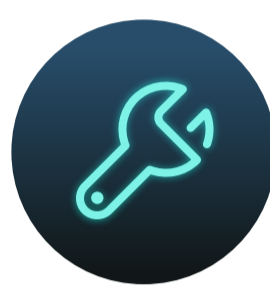

Evidence Collection
Powerful, rapid evidence collection from multiple sources. Provides a secure location for management of different file types.

User Management
Flexible user management allows secure access to multiple system sectors and resources.

Incident Reporting
Clear, effective reporting function enables users to quickly and easily view comprehensive incident reports and KPI analysis.

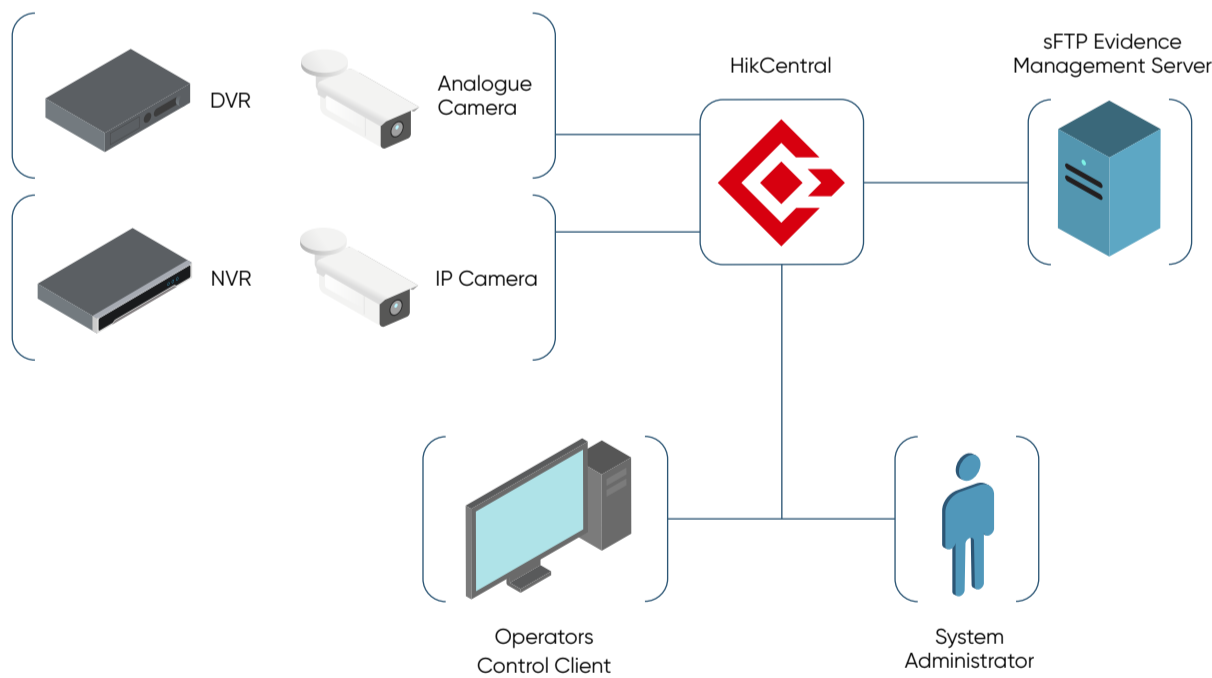

Audit Trail
Historical operation and maintenance information can be securely stored in the system for future use and auditing requirements.
