

Industry First HIKVISION SOLAR 4G CAMERA KIT

All-In-One Solar-Powered Security for Temporary & Remote Locations

All NEW standalone solar-powered security station for temporary sites and remote locations that do not have a network or traditional power connections.

Hikvision's Solar 4G Camera Kit includes all the components needed to provide site security in remote or temporary locations that do not have access to a network or power. This includes construction sites, outdoor venues, special event locations, farm and ranch applications, and more. The first of its kind in the industry, some benefits are:

- Reduce the cost of installation by not having to pull any cabling.
- Mitigate the risk of missing an event in an area that can not support the installation of a wired camera.
- Enhance your overall security plan by being able to see areas that could never have been seen before.
- Stay in compliance with regulations that force you to see the entire perimeter of your property at all times.
- Reduce the risk of a false liability claim by adding cameras to areas that previously could not be seen.

The complete solar camera kit includes a Hikvision 4G security camera, a solar panel, a battery and a bracket for mounting.

Security Without a Network or Traditional Power Source

PRODUCT SHOWCASE

Each solar 4G camera kit model DS-2XS6A25G0-I/CH20S40 comes with the Hikvision 4G Bullet camera, a 40-Watt solar panel, 20 Ah rechargeable battery, and a pole mount bracket.

- 2 MP resolution @ 30 fps, 2.8 mm lens
- DarkFighter for clear images in low light
- 98 feet (30 m) IR distance
- Built-in 4G (LTE-FDD/WCDMA) module
- The system detects power capacity by itself and enables power saving mode automatically.
