

Hikvision's New M Series NVR

8K NVR Built for the Security Industry

Super High Definition Data in True 8K

A comprehensive product upgrade delivers high resolutions with sharp imaging in expansive areas. M-Series NVRs support two channels at 32 MP decoding and 8K resolution or dual-4K output.

Highlights

Access & Store 8K Video

- 8 core 64 bit SoC chips ensure stable access to large data streams
- Dynamic Caching Technology provides a stable operation

Transfer 8K Video

- I-Frame Transferring Technology ensures video stream integrity
- Reduced frame loss and delays during transferring

Decoding of 8K Video

Decoding Capacity:
32-ch at 1080p, 8-ch at 8 MP,
16-ch at 4 MP, and 2-ch at 8K

Output 8K Video

- HDMI 2.1 Interface
- Output Resolution:
8K (7680×4320) / 30 HZ

8K NVR Solution

Monitor

Applications

Panoramic Cameras with ColorVu and M series NVRs for malls and shopping centers

- Larger field of view
- Cost savings
- Robust security

PanoVu Cameras and M series NVRs for wide area security

- High resolution
- Multiple angles
- Details in the scene
