# HIKVISION CERTIFICATION PROGRAM

## SCOPE

Hikvision's Certification Program trains security engineers to install and operate Hikvision devices, design related projects, and solve a host of security solution problems. With this program, security engineers will demonstrate their skill and expertise in advanced video surveillance integration.

## PURPOSE

- To provide industry-standard certification for advanced levels of expertise in video surveillance integration.
- To train individuals to master the installation of Hikvision video surveillance solutions.
- To elevate successful participants among competition, making them more desirable to end users when selecting a video surveillance integrator.

## CERTIFICATION LEVELS

### Hikvision Certified Security Associate (HCSA):

The Hikvision Certified Security Associate level certification focuses on training participants in essential operation & maintenance of Hikvision security products. It is designed for technical engineers who have worked in the security industry for several years and have already gained some security basics.

### Hikvision Certified Security Expert (HCSE):

The Hikvision Certified Security Expert level certification focuses on training participants in security system design with Hikvision products. It is designed for technical elites who design entire security systems and provide vertical solutions. Trainee must pass HCSA & HCSP certifications before applying for the HCSE.

### Hikvision Certified Security Professional (HCSP):

The Hikvision Certified Security Professional level certification focuses on advanced technical operation and foundational training on Hikvision's security products. It is designed for specialists with at least 3 years' security experience who are accomplished at solving complicated technical problems. Trainee must pass the HCSA certifications first before applying for the HCSP.

## COURSE DESIGN

### Hikvision Certified Security Associate (HCSA):

#### Training Objectives:

- Learn the fundamentals of video surveillance
- Become familiar with Hikvision's cameras, DVRs, NVRs, and other products
- Master the essential configuration of Hikvision devices
- Overcome general installation challenges using Hikvision devices

#### Product Training and Related Topics:

- Network basics, Turbo HD, IP Cameras, PTZ Cameras, DVRs & NVRs, VMS, Smart topics

### Hikvision Certified Security Professional (HCSP):

#### Training Objectives:

- Master the core technologies of Hikvision devices
- Master advanced functions and configurations of Hikvision devices
- Solve difficult issues using Hikvision devices

#### Product Training and Related Topics:

- Hikvision's Professional VMS, thermal technology, panoramic technology, ANPR, network storage, decoders & displays, mobile solutions

### Hikvision Certified Security Expert (HCSE):

#### Training Objectives:

- Design entire security systems with Hikvision devices
- Master the available vertical solutions

## CANDIDATES

- To become certified, individuals must be well-versed in Hikvision products and solutions, the latest network video technologies, and best-practice techniques.
- Hikvision will determine the candidate's eligibility to enroll in a certification course.

## TESTING

- Tests will be arranged at the end of the training and will include theoretical and operational components. A passing score is 80% or greater. Those who pass the test will receive a certificate of successful completion from Hikvision.
- Successful participants will be notified by E-mail. Individuals who score lower than 80% can request to retake the test within 90 days.

## CERTIFICATE

- Hikvision will issue a certificate to participants who score a passing grade on the test.
- All certifications are valid for 24 months from the date recorded on the participant's certificate of completion. In the event a successful participant changes employers within that time, Hikvision will confirm their certification with the new employer for the duration of

## CERTIFICATE SAMPLE

- Successful participants should allow up to 2 months to receive their certificate.

## RECERTIFICATION

- Considering the accelerated rate of the introduction of new technologies and products in the security industry, Hikvision requires that certified professionals recertify their credential by retaking the exam. Recertification candidates must retake the exam before their current certification is expired.
- Trainee can register 3 months prior to his/her certification expiration date to renew the certificate; otherwise, qualification will be invalidated.
